GURE 4 - ANALYTIC TOOL REPORT	7
FIGURE 5 - WIDGETS	9
FIGURE 6 - VISITOR LOG	10
IGURE 7 - PAGE TITLES	11

# **Note on Figures**

This manual uses screen captures of the Analytic tool as it was set up at the time. The graphs and displays may change, but general information will remain.

# **LOGGING ON**

The User Name and User Name combination for accessing the REVAMP Analytic tool is:

User Name: revamp

Password: BHU\*bhu8NJI(nji9

The Analytic Tool can be accessed at:

https://analytics.intellica.us

#### **DASHBOARD**

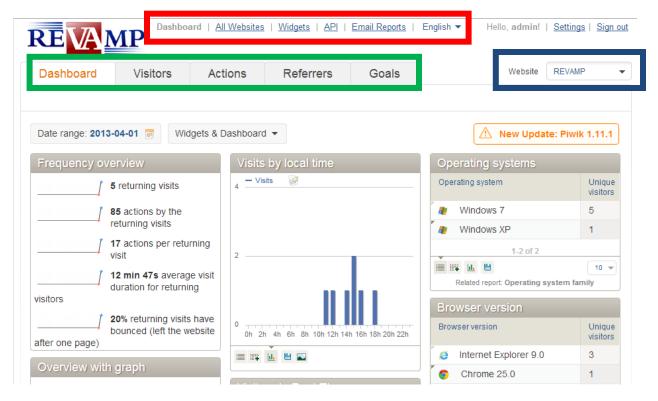

FIGURE 1 - DASHBOARD

There are three menus to be aware of:

- 1. The main menu is in the green box.
- The site selector is in the **blue** box. The User can select whether to view the REVAMP\_VA
   (VA/Provider facing application) and REVAMP (Veteran facing application).
- 3. The top bar is in the red box. Here, you can change the language and get access to some advanced settings. If you are monitoring more than one site, for example, the 'All Websites' link will provide you with an overview of how they are all doing on one page.

The rest of the page is the page content, in this case your Dashboard.

#### SELECT A DATE RANGE

By default, the Analytic Tool will show data for 'yesterday'. You can click on the calendar and select another date range to view reports. The Analytic Tool supports any day, week, month, year or custom date ranges.

FIGURE 2 - DATE RANGE

Example of a custom date range:

FIGURE 3 - CUSTOM DATE RANCE

You can change the default date that loads in the reports in the User Settings.

#### A LOOK AT AN ANALYTIC TOOL REPORT

Here is what a standard Analytic Tool report looks like.

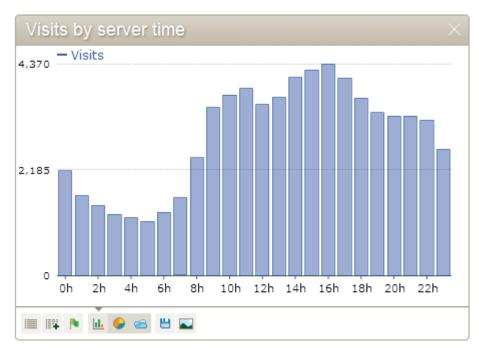

FIGURE 4 - ANALYTIC TOOL REPORT

This is what all those icons mean:

- ■ Display a simple table of just the main metric that the widget features
- Display a table with more metrics
- P Display goals information about this metric (if you are using goals)
- – Display a bar chart (usually, hovering your mouse over this icon will give you the option of choosing other types of chart, for example pie charts
  or tag clouds
  )

- ■ Export the data
- ■ Save the graph as an image
- Configures the report's data. Some reports can be "flattened", or rows with low visits excluded.

It is safe to experiment with clicking on these icons. You can easily go back to the original appearance by clicking the relevant icon. If you hover your mouse over any of these icons a tooltip will appear to remind you of what they do.

## DASHBOARD & WIDGETS

You can add new widgets to your Dashboard, to ensure it reports on all of your most important metrics. Click on the "Add a Widget" link: it will expand and you will see a list of categories. Run your mouse over the list and it will display a list of the individual widgets available. There are more than 30 in total. In the example below, the mouse hovers over Visitors and the top item on the list is "Visitor countries (world map)".

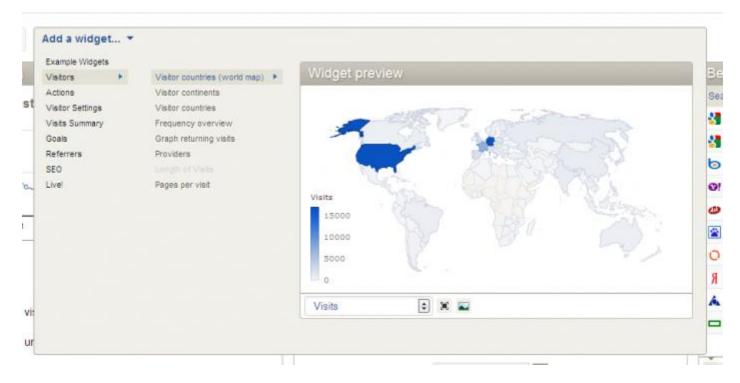

FIGURE 5 - WIDGETS

## VISITOR LOG

The User can access a log of the pages that have been visited by application Users. This log is located in the Visitors link in the main menu, in the Visitor Log sub menu.

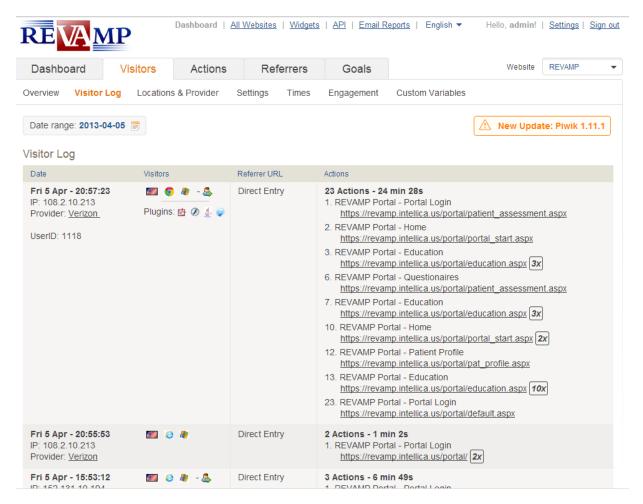

FIGURE 6 - VISITOR LOG

#### **USER ID**

In the first column in the Visitor Log you can see User IDs associated with users. These are the User IDs that can be used in the REVAMP VA facing portal to look up a patient in the Lookup dialog.

## **PAGE TITLES**

If the User would like to view the Page views for a page, along with other statistics, the User can go to the Actions menu, Page titles sub-menu.
